

# YOU'RE INVITED

to the world's premier invitation-only forum dedicated to energy efficiency.

## OVERVIEW

Over the last six years, the Energy Efficiency Global Forum (EE Global) has evolved into the one event that assembles the experts and leaders responsible for driving the future of energy efficiency. EE Global 2014 is an invitation-only opportunity to join in the robust debate, partnership building, and idea sharing necessary to empower energy efficiency's influencers around the world. Hundreds of C-suite executives and policymakers from across sectors, disciplines, and borders will convene at EE Global for two days of unparalleled networking and impactful learning. Join them in Washington, D.C. on May 20 & 21 to integrate effective policies and business practices into actionable plans for the next generation of energy efficiency.

## AGENDA

EE Global offers over 25 discussion-based sessions that put YOU, the attendee, at the center of the conversation rather than listening to canned pitches and viewing lengthy PowerPoint presentations. Delegates will tackle pressing issues alongside senior energy officials, business executives, efficiency advocates, and academic experts who will serve as thought leaders and conversation starters in broad-vision plenary, executive dialogue, and intensive learning sessions.

## AUDIENCE

EE Global 2014 is an exclusive conversation limited to invited leaders from public and private sectors who are integral to the energy efficiency community. EE Global convenes international decision makers from dozens of countries who are not just sharing best practices, but shaping them. To join this high-level group, request an invitation at [eeglobalforum.org](http://eeglobalforum.org).

## LOCATION

As the global gathering place for policy makers, industry movers, and efficiency shakers, Washington, D.C. is the perfect destination for EE Global's delegates from around the world. Washington's unique blend of history, government, advocacy, and culture offers something for everyone. The centrally located Convention Center is just as accessible to Capitol Hill as to the airport.

## HOST

The Alliance to Save Energy promotes energy efficiency worldwide to achieve a healthier economy, a cleaner environment, and energy security. For more information about the Alliance visit [ase.org](http://ase.org).
